## Office Trash Pickup Practice

## Office Recycling Pickup Practice

### Comments

Recycle is picked up weekly, but there are central locations if you need to dump quicker.

Our janitorial contract is scheduled to only pick up deskside receptacle once a week. Employees are not allowed to place any wet products in the deskside receptacle. Recycling pickup near the office desks is only white paper into a central receptacles that are placed through the office area.

Office pickup on Fridays only, with central trash pickup daily

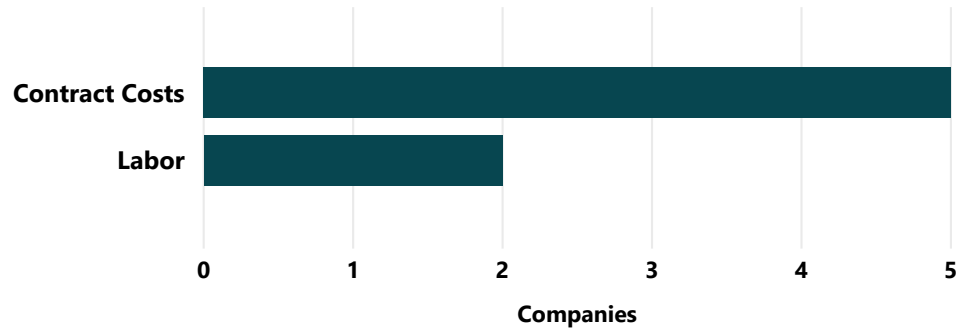

Janitors pick up trash employee take recycle to a recycle bin in area

Employees have trash & recycling bins at desk, but self manage and empty both to a central point on the floor/building. Janitorial empties only the central & common areas.

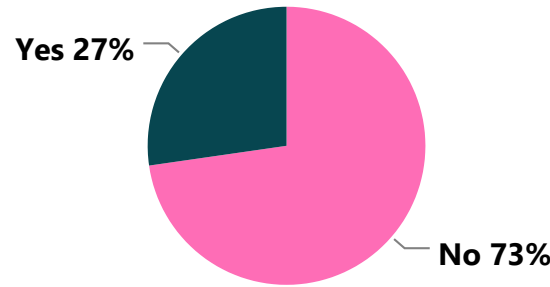

3x/week except call center is daily

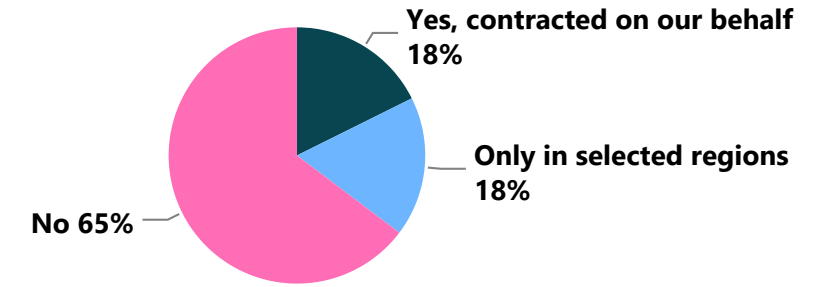

### Savings Due to Central Trash/Recycling

### Considering Central Trash/Recycling?

### Composting Program?

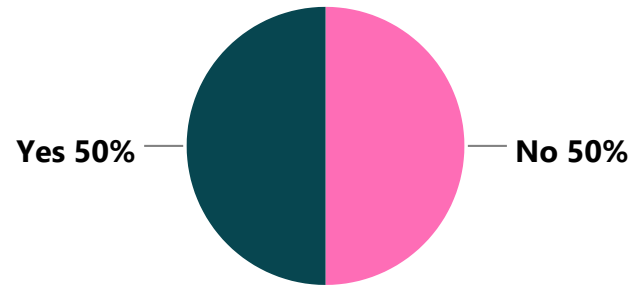

### Centralized Trash

**Comments**

- Good communication
- In 2009 we changed our daily pick-up of desk-side trash cans from 5 days a week to only once a week. It helped lower the overall janitorial contract expense.
- It's more expensive to recycle but we have a corporate policy to recycle as economically as possible.
- Lots of Communication. Change management.
- n/a
- Our employees are responsible for collection and disposal of recyclables.
- Policy guidelines and best practices implantation. Communicated well.

### Think It Can Be Done?

### No Centralized Trash

**Comments**

- I think the employees will push back... NOT my job

### Composting

**Comments**

- Large scale composting facilities are difficult in Portland. The region had a major facility but had to reduce operations due to odor issues.
- Limited to only one building
- Pilot program only
- Very limited but could be based upon the County or City ordinance of where the compost is being generated.
