

Office Trash Pickup Practice

Office Recycling Pickup Practice

Comments

- Recycle is picked up weekly, but there are central locations if you need to dump quicker.
- Our janitorial contract is scheduled to only pick up deskside receptacle once a week. Employees are not allowed to place any wet products in the deskside receptacle. Recycling pickup near the office desks is only white paper into a central receptacles that are placed through the office area.
- Office pickup on Fridays only, with central trash pickup daily
- Janitors pick up trash employee take recycle to a recycle bin in area
- Employees have trash & recycling bins at desk, but self manage and empty both to a central point on the floor/building. Janitorial empties only the central & common areas.
- 3x/week except call center is daily

Savings Due to Central Trash/Recycling

Considering Central Trash/Recycling?

Composting Program?

Centralized Trash

Comments

Good communication

In 2009 we changed our daily pick-up of desktide trash cans from 5 days a week to only once a week. It helped lower the overall janitorial contract expense.

It's more expensive to recycle but we have a corporate policy to recycle as economically as possible.

Lots of Communication. Change management.

n/a

Our employees are responsible for collection and disposal of recyclables.

Policy guidelines and best practices implantation. Communicated well.

Think It Can Be Done?

No Centralized Trash

Comments

I think the employees will push back... NOT my job

Composting

Comments

Large scale composting facilities are difficult in Portland. The region had a major facility but had to reduce operations due to odor issues.

Limited to only one building

Pilot program only

Very limited but could be based upon the County or City ordinance of where the compost is being generated.
